MICRO SYSTEMATION

XRY Complete from MSAB is truly the most complete forensic solution for handheld devices on the market

XRY Complete is not only able to perform both Logical and Physical readings from mobile devices such as phones, GPS and more, it also comes in a handy case with bespoke interior and all the necessary hardware included - keeping your system complete, organized and always ready to use in the office or elsewhere.

Through effective use of our features, XRY can save the forensic investigator a lot of time.
For example our praised Phone Guide, the unified Logical/Physical extraction Wizard and the combined Logical and Physical XRY report as well as the free XRY reader and XACT hex viewer.
As an example; using the help file in the extraction wizard you can easily find all information regarding how to best connect to the phone, what data you may retrieve and perhaps more importantly - what you cannot expect to get.

Knowing in advance what features are and also are not supported on any particular device is a critical time saver.

This all-in-one system features a Panasonic Toughbook U1 –
with the latest version of Micro Systemation's software installed and configured –
with cables, SIM card reader, infrared and Bluetooth communications, as well as hot swappable batteries that last up to 9 hours.
The highly durable case, manufactured by Storm Case™, features press and pull latches, Vortex® valve – that automatically adjusts air pressure without letting in water, unbreakable molded-in hasps and soft-grip, solid-core carrying handle.
Micro Systemation's XRY Logical and XRY Physical are today recognized as the industry standard in mobile phone forensics and is widely used by law enforcement agencies and other organizations around the world.

For more information please feel free to contact Microsystemation
